

Lead Software Engineer

Internet Brands - Los Angeles, CA - internetbrands.com

August 2015 - Current

- Directed a team of developers locally and remotely to maintain and add features to a large legacy software application that manages dozens of web sites.
- Created a gitflow policy that best fit the sprint release cycle, and allowed for a more time variable QA and UAT process without a code freeze.
- Designed and implemented a strategy to slowly transition, route by route, the legacy application into a new laravel code base without delaying business requests or bug fixes.
- Wrote detailed plans for several large feature additions.

Director of Web Development

Phase 3 - Nashville, TN - phase3mc.com

April 2014 - August 2015

Clients: Coca Cola, Kroger

- Managed a team of developers to build 75+ Websites, 3 iPhone Apps and 2 Android Apps.
- Developed a robust CMS that includes: a REST Capable Routing System, PSR-0 Autoloader, Modularized Component System that allows for centralized updating of all instances of the CMS.
- Developed coding standards, documentation standards, and processes for managing large web applications that are more secure and are more easily maintained.

Senior Developer

iDesign Inc - Nashville, TN - meetidesign.com

November 2010 - April 2014

Clients: Veggie Tales, Hearing Planet, The Ryman

- Developed an ORM called Framework that increased security and made common and repetitive communication with the database faster and more memory efficient.
- Programmed 100+ Web sites including database planning and optimizing, application logic flow sheets, API design, and unit test planning.
